FIRE DEPARTMENT

REPORT OF ENGINEERS.

The Board of Engineers respectfully submit the following report:

There have been six alarms during the year, two general and four still alarms:

- Jun 7 Stebbins block, Dr. Gray's Office.
- Jul 21 Coal shed, W. G. Smith.
- Aug 11 Store, C. M. Cook.
- Sept 4 Willard Howe place.
- Nov 17 W. B. Stacy, box shop, O. C. Robertson Co.
- 26 Old house, Whittaker farm.

The system installed this season has proved ample for any reasonable demand made upon it.

For ordinary expenses would recommend that \$500 be raised and appropriated. Would recommend that 500 feet rubber lined hose, also rubber coats and hats be purchased this season. Calling for an additional expense of \$400.

Respectfully submitted,

FRED A. BUCKLEY, Chief Engineer.

C. D. FAY, 1st Asst. Engineer.

H. J. DELPHY, 2d Asst. Engineer.

C. E. WEED, 3d Asst. Engineer.

J. P. McCAUGHERN, 4th Asst. Engineer.

S. W. HUDSON, Treasurer.

REPORT OF THE PUBLIC LIBRARY and READING ROOM.

LIBRARY.

Total circulation for the year, 13,953, divided as follows:

Fiction,	9,922
Miscellaneous,	1,548
Magazines,	2,483

Average daily issue, 47.

Largest daily issue, 164 on Mar. 5.

Smallest daily issue, 6 on May 3.

While the total circulation is less than last year, probably on account of decrease in population, it is gratifying to find

that the circulation of non-fiction books is considerably larger.

In all 494 books have been added:

From John D. Hooker gift fund, 192.

Miscellaneous,	109
Fiction,	83

From town funds, 309.

Miscellaneous,	76
Fiction,	126

Never in the library's history has it received so great a gift as at Christmas last, when, through the generosity of John D. Hooker, a native of Hinsdale, now of Los Angeles, Cal., the sum of \$500 was given for the purchase of new books. Only about two-fifths of this sum has so far been expended. This gift will help to a large extent in placing at the disposal of the public, much needed, up-to-date books on many subjects which the regular appropriation would not allow.

Grateful acknowledgement is also given to Rev. A. M. Bradley for a large revised edition of the Bible, with which the library was not supplied, also to Mr. R. A. Clogher for five volumes of miscellaneous books, a bronze statue of Rembrandt and an ornamental vase.

661 borrower's cards are in use.

Among the valuable books of reference added in the past year we would mention Great Events by Famous Historians, 20 vol., Famous Composers and their Music, 16 vol., Modern Shop Practise, 4 vol.

For several years the library has needed to replace several sets of works of standard authors. The John D. Hooker gift fund made this possible and excellent sets of Dickens, Eliot, Holmes and Thackeray were purchased.

The financial report of the librarian for funds in the library is as follows:

Cash on hand in library, Feb. 15, 1910,	\$14 38
Rec'd from fines, old magazines, cards, catalogs, etc.,	27 91
	<hr/>
Total,	\$42 29
Paid for freight supplies, printing, postage and general expenses,	29 98
	<hr/>
Balance on hand Feb. 15, 1911,	\$12 31

READING ROOM.

Total attendance, 4,416; average daily attendance, 15; largest daily attendance Feb, 19, 48; smallest daily attendance Dec. 16, 4.

Few changes have been made in the periodicals during the past year. Three daily papers, one each from New York, Boston and Springfield, are to be found, also nine weekly periodicals and 25 different monthly magazines. All of these may later be found in the library for circulation.

Through the courtesy of the Forbes Library, of Northampton, we have recently had two picture exhibits upon the reading room walls. Thus far these pictures have been secured to supplement the work of our public schools but should be of interest to all our patrons.

Respectfully submitted,

HERBERT M. WILDER,
FRED'K S. LEONARD,
LIZZIE L. BAILEY.

CHARLOTTE S. SLATE, Librarian.

Audited March 1, 1911.

H. W. TAYLOR, Town Auditor.

SUPERINTENDENT'S REPORT.

To the Board of Education, Town of Hinsdale:—

This annual report of the superintendent is able to present several features of our school work of the last year and of the past three years which are a real satisfaction. There are, of course, more matters which might be remedied if determined attention is given to them, which are not at present such sources of gratification. However, these matters can best be remedied by silent and steady treatment. This report pur-
poses to deal plainly, but courteously, with the state of the schools in the town.

The improvement of schools is brought about, not by revolutions sudden and irritating, but by the fostering of a steady growth toward the better, as improvements in all living

things are effected. By comparison of our present with our past it becomes evident that a different state of affairs in the schools has come about in respect to the following particulars: (1) Standing of the pupils as regards accomplishing work of standard quality; (2) attendance; (3) the interest and ambition of pupils to excel, marking the end of the old state of indifference once common; (4) improvement in the definiteness and thoroughness of the teaching. This latter has been accomplished through the efforts of the teachers in training themselves to better methods and by the furnishing to the schools of definite and detailed courses of instruction.

The pupils in the schools are doing better work and a larger variety of it than heretofore. They can read better, uniformly throughout the grades; by which is meant that they can read more rapidly and more intelligently. The first thing which a child must learn to do on entering school, that which he must learn to do before even beginning his education proper, is learn to read. If a child is allowed to dawdle along in his reading several things may result,—he may acquire the habit of reading so slowly that the day is not long enough for him to get his history or geography lesson later on; or, he may learn to read words without getting their sense as they are put together in a sentence. There is too little reading for business, or rather too little business in reading in schools everywhere and it is proposed, during the term of service of the present superintendent, that children in the primary grades shall learn to read decently well, and that they shall not be promoted from those grades until they do, if it requires twenty years to teach them. For people will readily see that it is perfectly useless and a waste of time to try to teach a child anything else until he can use books and can write with facility. Our second grade children this year are, in the majority of cases, as good readers as could be fairly expected at their age. They are not as good as they can become, nor as good as a second grade can be made, but they are doing com-

parative good work. A child is promoted from the first to the second grade when he can read as well as he ought to read for that grade and not before and on no other basis. It may interest people who are not aware of it that we teach children to read to-day without the bother and waste of time of teaching them their letters previously. No harm is done if the child comes to school already taught at home. It is well for parents to teach their children to think and reason. On the other hand, we can teach children to read from the words and sentences directly, learning their letters as they go, and save all the time previously required to learn letters. It is rapid, intelligent, direct process. How it is done we cannot explain. But we know it can be done and is done every day in good up-to-date schools.

Arithmetic is being taught in the primary rooms by a new method. In order to understand its advantages there is one principle of child-training which ought to be understood and taken advantage of by every parent, viz.: a child must learn whatever he is to understand well through his own activity, through what he himself actually does with his hands. A child learns to do things, he gets ideas, by means of what his hands work out. With all of us it is the same way. Ideas always come faster when our hands are busy, and they come clearer. The times when we cannot think are when we sit still and try to think. Now with children it is destructive of all mental advance and productive of laziness and stupidity for them to be cooped up in a schoolroom and required to sit quietly and study out of books alone. When a child of six years age is still habitually he is needing the attention of a physician. And when you compel him to be still and idle at the same time you are laying in him the foundations of an idler later on. In view of this, the old policy of training by repression of all normal activity is giving way to the introduction into schools of all sorts of things to keep children busy and to give them hand work to help them to

make their own ideas. Keep children ever busy at something worth doing, from the child's standpoint, and you are educating him every minute.

If a child is to learn arithmetic he will not do it best by juggling with dead figures and books. He will do it by means of working out in school actual construction work which will give him correct ideas of number, proportion, form, size, etc. This work is done with actual material in the hands of the pupils. The handwork may consist in paper-cutting, stick-laying, clay-modeling, weaving, and the like. But actual building up numbers with real things is the way we teach primary arithmetic at present. In general the character of the arithmetic work in all the grades has been modified. The chief mathematical work of the adult workmen is concerned almost entirely with measurement in some form. It may be figured with money, with length, surface or volume; with contents of cylinders, or areas of circles; with wood and lumber, or with the various trades craft. So we are devoting more time and attention to work based on measurement, and omitting the more useless and preplexing problems of cube root, bank discount, and partial payments. Interest, taxes, insurance are some of the principle applications of percentage which are taught. But it is of mighty little profit to a pupil to spend valuable school time working the curios of arithmetic and be unable to work accurately with common fractions and decimals. We want a business speed in computations; a business neatness of work; and a business simplicity of doing things combined with a practical knowledge of common things. And the schools are getting it.

One conspicuous lack of the pupils in the school was in what might be called general information; lack of any practical knowledge of even the simplest things which lay about them and ignorance of the world at large both past and present. This lack of a wide information made it impossible for the pupil either to take interest in his work or to understand

it. In general it may be said that interest in anything depends directly on our ability to understand it. Several lines of work have been taken up in the schools designed to correct this state of affairs, but it will only be necessary to explain one in detail to show the idea we are pursuing.

The history of America cannot be appreciated or enjoyed until something of the history of the world before America was discovered is known. America is not original; almost all of our ideas have been borrowed from the Old World.

Our art came from Greece, our law from Rome, our idea of liberty from England. So, in order to give a child a broad base on which to construct his estimates of America, we are teaching the following scheme of history work:

GRADES I AND II.—Stories of the lives of primitive peoples, like the Indians.

GRADE III.—The beginning of history; children of history. Stories by the teacher of men and children famous from Moses to Lincoln.

GRADE IV.—Readings in America's Story, continued through the next grade.

GRADE V.—America's story continued as far as the period before the Civil War. Readings in Greek History.

GRADE VI.—Readings in Roman history. Readings from the history of all nations from ancient China and Egypt to England.

GRADE VII.—Study of elementary English History.

GRADES VIII & IX.—Study of detailed American History. Geography is done in much the same way. It is becoming more a study of climate and products; routes of trade; industries of countries; how men live everywhere.

A good deal of out-of-door subjects are being brought in. It is designed to show the value of birds; study insects injurious to vegetation and means of destroying them; plants, and their life histories; ways of wood creatures; trees and forests. The pupils themselves are apparently taking a much

greater and more sustained interest in this increasing content of their school life. Our attendance is much better. Two years ago we were troubled by truancy to a considerable extent. There is very little to complain of in this direction now. One room which was troubled the most at that time during the fall term just past maintained easily an average attendance of over 96 per cent.

School officials and teachers often have opportunity of seeing physical defects in children which escape the notice of parents at home. Then teachers are more or less skilled in watching for these things. Poor eye sight and defective hearing are two of the most common physical defects of children. School work is taxing to both of these senses and it is a part of the honest responsibility of the school to be on the look out for defects in them. During the last month or two, tests have been taken of all the children in the schools of the towns of Hinsdale, Swanzey and Dublin. The tests in vision were performed by aid of the Snellen Test Letters, a test which is the official one in the State of Massachusetts. It is the test also used by reliable opticians. While this test will not detect all faults of vision it will detect the more pronounced and common ones such as astigmatism and near sightedness. It is the intention of the superintendent to send notification of defects to the parents of all children in whom such defects are found. However, it will be distinctly understood that there is nothing compulsory about the matter and no parent is obliged to pay any attention to it against his wish. We recommend no optician or physician, leaving each one to use his own judgment and preference as to that. We assume, however, that most parents who are on the watch for the best interests of the child will be only too glad to be informed of eyesight troubles noticed in school and will wish to remedy the matter.

Tests for hearing are not generally satisfactory, but it is intended to have the teachers on the watch for defects in hear-

ing. Faults of hearing are often caused by adenoid growths in the throat and adjacent passages. If parents realized the devastating effects of these growths which even in the long run effect an exhaustion of nervous energy and mental force, causing dulness and stupidity in the child, they would need no second warning to attend to them speedily.

It usually happens, that when the children are found backward in their studies, the cause is not mental but physical. Backwardness, in the great majority of cases is caused by the child's inability to see properly and hear well. Small wonder that children who cannot see to read, or who cannot see well enough to read without dizziness and headaches are backward and fail of promotion.

In this connection it may be said that the schools are beginning to arrange for less home study by the pupils at night. This will be found to result in the long run in a saving of the eyesight of young people. The superintendent wishes to place himself on record as condemning the present amount of home study forced on children by teachers. It is usually the resource of an incompetent teacher. Why? Because the school, properly considered, is a workshop and the children are apprentices learning a trade. They should do their work under the eyes and personal direction of the teacher who is their master mechanic. It is the teacher who is incompetent to teach on the spot who escapes this responsibility by forcing the pupil to sweat the life blood out of him at home doing work which should be done at school. Again, if a teacher is competent, she will so keep her school attending to strict business that the amount of time often wasted by dawling and fooling will be employed in doing work which is sometimes sent home. There is enough time in the school day in which to accomplish all that a child should be required to do if he is kept attending to business. There is no need of any home work below the seventh grade and of very little in any grade below the High school.

One thing which the schools are beginning to have done in school, and which should never be sent home anyway, is arithmetic. At present the arithmetic is being taught on the spot in the grammar school and it is believed that the pupils are profiting by it. Parents have a right to object to so much ruinous study by lamplight on the part of their children. A child's time should be free out of school for romping and play; for music lessons and recreation of all sorts; for social times in the evening. All of those are as much a part of true education as are books. In the High School, owing to different conditions, considerable work will need to be done out of school. But we believe that the necessary amount of home study time could be much reduced if the pupils were properly prepared before they entered the High School.

Parents are warned earnestly to be on the watch for physical strains of all sorts in their children. It is far from wise to allow a young man's or young lady's health to be undermined in getting an education. Better let education go to the winds than sacrifice health for it.

Here it may be remarked that the sanitary conditions of our school houses have been seriously questioned by many people. It is not the business of this report to criticise the buildings in which the town see fit to house their children.

It will be the business of the taxpayers to take initial action on this matter. In the High School the greatest single need in the line of equipment is a laboratory. This would be in the nature of a workshop for the working out of several things pertaining to practical education. It has been my belief for some time that a High school should concern itself less with pupils who are going to higher schools and more with those who are going to stay at home. Not by any means that collegiate preparation is to be neglected but it is the case at present that in many High schools, these subjects constitute about all there is taught. There is no reason why our High school should not serve the needs of the community

better than it is doing. We do not wish to lower its grade but we wish to introduce some other things besides Classics. We do not want an industrial school here, the community is not large enough to bear the expense. But there is opportunity of doing more for our young people than we are yet doing. Instruction in trades should be given and can only be properly given by master mechanics in their several lines. It cannot be given in schools unless the teachers are practical tradesmen. On the other hand there are certain lines of study which precede the study of technical trades work and which help a boy or girl to be a more efficient worker later. Subjects which can be taught and which are worth while are elementary physics and mechanics, mechanical drawing, elements of agriculture, including practical biology, botany, and chemistry, domestic science, as the scientific principles of cookery, home decoration, chemistry of common life, transmission of disease and protection against it, music, elementary chemistry, etc. It is a mystery why we want our children to understand more about French than they do about the common things of the garden and household, the workshop and the store.

One reason which operates against the practical courses is that they are more expensive to operate than are the classical courses; and also more difficult to teach. The easiest kind of a High school to run and the cheapest to pay for is the classical one. Dead languages and dead books are so much easier to teach than live topics. One has to be extremely up-to-date to teach real life. But the old fashioned subjects which persist in our schools, in spite of the fact that they are in some cases worse than useless, are simple to manage. Almost any one can do it, and if they do not most people could not detect the difference. And meanwhile our children are graduating from High schools about as useless for life as when they entered, it may even be with less ambition.

This much is said to arouse people to appreciate the fact

that a considerable improvement in our school can be made at once if it can be afforded. A laboratory or workshop where this kind of teaching could be done, and, more important than all, where the students could go and work for themselves is within our reach. It is suggested that a laboratory be fitted up in the basement of the High school building to accommodate such practical work as could be put in. It would at present be used chiefly for these things: Physics and chemistry; biology and drawing; and include a bench with a vise or two and some tools. It would contain proper cabinets for the storage of apparatus and would effect a saving in breakage. The cost of such a laboratory in the south-east corner of the basement is estimated at from \$300 to \$500 according to the equipment. Additional money would need to be raised later but this would start the work and give us the room. Cement floor, steel ceiling, sheathed walls, and electric light, if needed would be the plan. And without a place to work it is easy to see that work cannot be done.

And hence this suggestion for a practical place to do school work of a practical nature.

Our work in music and drawing this year has been somewhat broken into. The Supervisor of Drawing, Miss Lillian V. Whiting, resigned her position with us to take a position as teacher of drawing and manual training in Brattleboro, Vt. This necessitated our employing the same teacher as some of the other towns around us, as we could not afford to employ one of our own giving us her entire time. Miss Whiting was employed in connection with Northfield, Gill and Shelburne Falls, Mass. These towns employ all of their present supervisor's time so that there was none left for us. After considerable time and search we were fortunate in securing Miss Abbie Chellis, who teaches drawing in the schools of Keene and Winchendon, Mass. She began her work in January, and, although the time elapsed since is too

short to have made any marked advance in work yet we feel so well satisfied with the ability she has shown at the beginning that it seems safe to prophesy a very successful year's work in that subject.

Miss Edith Cummings in music is employed in conjunction with several towns in Massachusetts and makes her headquarters at Millers Falls. We cannot commend too highly Miss Cumming's work in our schools. She is peculiarly fitted by temperament and personal enthusiasm for a good leader in the singing. She has introduced systematic work in writing music and the elements of musical theory which all can understand whether naturally gifted with voice or not. Her work in the High school is not only highly appreciated by the school officials but by the students themselves.

In conclusion we wish to urge people to visit our schools. It is poor practice to leave the education of the one most dear in the hands of strangers without looking in once in a while to see how his health is being looked after, smell the ventilation, inspect the premises, watch the child do things, and see his interest in school affairs. Things often appear quite different than they do by hear say, sometimes better, sometimes worse. But we are not called upon to forego the pleasure of knowing how our child is getting on because we do not understand education. Any one of common sense can tell something about good common sense, and practical training. No one knows all there is to know about education, be he teacher, superintendent, or committee and the parent has many good ideas which we are all always glad to have expressed.

Attention is called to the Regulations for Promotion enacted during the past year by the Board of Education, appended to the report.

Respectfully submitted,

H. H. PRATT.

February 27, 1911.

REGULATIONS CONCERNING PROMOTION AND GRADUATION IN THE HINSDALE HIGH SCHOOL.

POINTS.—A subject requiring one recitation period per week throughout the year shall, when passed by the pupil, be reckoned as one point. All subjects shall be computed on this basis, *e. g.*, a subject occurring for five recitation periods per week throughout the year shall be reckoned as five points; one occurring five periods per week for half the year shall be reckoned as two and one-half points, and so on.

Drawing and music shall be allowed to count as points provided work of standard proficiency shall be done in each subject.

For graduation from the school, entitling the pupil to receive the diploma, a total of eight points shall be required, an average of twenty points each year.

Points shall be accredited on the basis of 75 per cent as passing rank.

STANDING AND PROMOTION.—To gain full standing in the Sophomore class, pupils must have passed in sufficient subjects to have gained twenty points; in the Junior class, forty points; in the Senior class, sixty points; and for graduation, as above stated, eighty points.

Pupils may be advanced to the Sophomore class, conditionally, with a deficiency of five points, but shall not be admitted to the Junior class until the total of forty points shall have been gained.

Failure to pass the first half-year's work in Algebra, Geometry, Latin, Physics, Chemistry, shall exclude the pupil from such work until the following year.

The necessity of this action in these particular subjects arises from the fact that the progress of the class during the second half-year is dependent on the mastery of the elements gained the first half-year; and no pupil can hope to be more

than a drag on the class and a dissatisfaction to himself who does not gain such mastery the first half-year.

Ranks shall be reckoned at the middle and end of each term, and cards sent to the parent or guardian at those times. Pupils whose average is ninety per cent or above, will be excused from the examinations at the end of each term. All others will be required to take examinations at the end of each term, and the mark attained in these will be reckoned as counting one-third of the average rank for the term and year, the daily rank counting two-thirds.

The average of the six term rankings shall constitute the rank for the year.

On the report cards and in the record books the following system of ranking by letters is used and the values of the letters are here given:

A—100 to 95 per cent.

A— 95 to 90 per cent.

B— 90 to 85 per cent.

B— 85 to 80 per cent.

C— 80 to 75 per cent.

D— 75 to 70 per cent.

D— All below 70 per cent.

Either rank below the line fail to pass.

CERTIFICATES.—Pupils who do not complete the course, or who do not gain the requisite number of points to entitle them to a diploma shall, upon leaving school, be granted a certificate in which shall be stated the amount of work for which he is entitled to credit.

In such certificate he shall be considered as entitled to credit for only the number of points he may have gained as computed by the first paragraph.

Graduation with high honor will be given to any pupil whose average for the whole eighty points shall not be less

than 90 per cent with no subject below 85 per cent. Graduation with honor will be given any pupil whose average for the whole eighty points shall not be less than 85 per cent with no subject below 80 per cent.

REGULATIONS CONCERNING PROMOTION FROM GRAMMAR TO HIGH SCHOOL.

1.—All pupils whose daily average for the year beginning with the date of this ruling (Jan. 4, 1911) shall be 85 per cent or over, shall be admitted to the High School without examination at the close of the year.

All pupils whose average shall not be as high as 85 per cent shall be required to pass a satisfactory examination for admission to the High School during the last week of the school year in June.

2.—In computing the daily averages such written tests as the teacher sees fit to give each week or month or term shall be included.

Consideration shall be given in the ranking to all work of the pupil whether oral or written: and he shall be ranked upon his neatness, accuracy and speed, the last being subordinate to the other two.

3.—The following subjects shall be included in making up the final rank:—arithmetic, physiology, history, geography, spelling, language (and grammar), civil government, music and drawing.

The work of the pupils in theoretical or written music shall be reckoned in the ranking, but no rank shall be assigned in oral music, provided that, in the judgement of the instructor, the pupil does his best.

4.—Any pupil failing to gain a sufficiently high daily rank to admit him to High School without examination, and also failing to pass the examination in June shall be entitled to a

second examination on the last Thursday preceeding the opening of the High School, provided:

He has not fallen below 60 per cent in any subject taken in the first examination, and provided

He has not failed to attain a passing rank in more than two subjects.

Pupils falling below 60 per cent in any subject, or failing to pass in three or more subjects will not be entitled to a second examination.

5.—Failure in one subject in the final tests will not exclude any pupil from the High School provided he does not fall below 60 per cent in that subject; but no pupil will be admitted to the High School who fails to do satisfactory work in Arithmetic or English Grammar.

6.—Pupils of the Eight Grade who have failed of promotion to the Ninth will, if they so desire, be allowed to take the High School entrance examinations the following with the Ninth Grade and under the same conditions.

PRINCIPAL'S REPORT.

To the Superintendent of Schools:—

Following is the report of the Hinsdale High School for the year 1910-1911.

In this report last year quite an extended outline of the work of each class and the methods of work was given. It was also stated that the aim of the year's work was, "to fit the courses of study to the needs of the town as far as possible." The way in which this was attempted was outlined, and as the results proved good the same methods are in use this year. I refer you to that report for them.

It has proven a far easier matter to state this aim than to accomplish it, and although a good beginning has been made it is by no means fully realized. The boy or girl who

wishes to go to college can get his training and go directly from here as well as from anywhere. He must of course realize that whether he gets into college or not depends not so much upon the school, as upon the use he has made of his time while in school and the advantage he has made of his opportunities. The necessary instruction is there; any pupil who has taken the right courses and has maintained a certain high average during the four years of high school can be confidently recommended for college.

Now about those who do not intend to go to college or go further in school, and who usually make up the majority. It is for them that we are now working the most. We felt that during the past year much has been done to make the work more practical for them. One example will illustrate what is meant. When the class in Physics was studying heat, the subject was approached from the practical and useful side. The class discussed for one thing the advantages and disadvantages of the different methods of heating a house and drew diagrams to illustrate their ideas of the subject. Along with this naturally went the subject of proper ventilation. The same idea is carried out in the other subjects whenever possible. It is hoped that next year much more can be done along this line. We want the courses to be such that if a boy intends to be a farmer or a carpenter or what not, he will be a better farmer, or a better carpenter than he could be with out his high school training.

There has been one change in the courses of study as will be seen from the table at the end of this report. Two years work in German is now given in both the English and Latin courses. There is much interest in Music this year and the girls have formed a chorus that is a credit to themselves and to the music teacher. I am also very much pleased to report that throughout the school there is an excellent spirit and interest in the school and its work. Nearly every one seems to be working conscientiously and doing his best; and to-

gether make up a set of earnest, well working young people.

Last June two were graduated and are now continuing their work in Normal school. In September a class of 13 entered from the Grammar school. The present enrollment is as follows:

Freshman class—Boys 4, girls 8, total 12.

Sophomore class—Boys 2, girls 6, total 8.

Junior class—Boys 3, girls 7, total 10.

Senior class—Boys 4, girls 5, total 9.

Total—Boys 13, girls 26. Grand total, 39.

Respectfully submitted,

E. I. BARTLETT, Principal.

ROLL *of* HONOR.

HIGH SCHOOL.

First Term—Edna E. Bergeron, Clara E. Campbell, John W. Coll, Ella J. Hall, Elizabeth C. Lynch, Mary E. Mann, Doris D. Merritt, Orlando Owen, Louis M. Stearns, Roger K. Streeter, Florence M. Wright.

Second Term—Orrie Lebert, Elizabeth C. Lynch, Louis M. Stearns, Roger K. Streeter.

Third Term—Elizabeth C. Lynch, Louis M. Stearns, Roger K. Streeter.

GRAMMAR SCHOOL.

First Term—Ruth M. Bradford, Alice M. Delphy, Mollie C. Hall, Helen M. Merritt, Gladys C. Stearns, Harold W. Stacy, Cornelius Weeks, Doris M. Wellington.

Second Term—Alice M. Delphy, Mollie C. Hall, Roy G. Metcalf, Marion S. Robertson, Gladys C. Stearns, Cornelius Weeks.

Third Term—Alice M. Delphy, Ernest W. Hall, Roy G. Metcalf, Gladys C. Stearns, Ruth A. Streeter.

SUB-GRAMMAR.

First Term—Daniel Duggan, William Gilliland, Ellis Hall, Winfield Hancock, William Kilhart, Ellen O'Connell, Willie Powers, Raye Spreague, Lillian Sweet, Charles Taylor, Nina Wellington.

Second Term—Lyman Barrett, Daniel Duggan, William Gilliland, Margaret English, Winfield Hancock, Ruth Langille, Ellen O'Connell, Willie Powers, Lillian Sweet, Bernice Veber, Jason Wright.

Third Term—Winfield Hancock, Marrion Jeffords, Ellen O'Connell, Ruth Owen, Hazel Shaw, Raye Sprague, Hazel Stevenson, David Stewart.

GRADE V.

First Term—Pauline Bailey, Earl Bradford, Aime LeVasseur, Gordon Martin, Lillian Mead, Mildred Merritt, Harold Perry, Harold Weeks.

Second Term—Earl Bradford, Aime LeVasseur, Lillian Mead, Mildred Merritt.

Third Term—Pauline Bailey, Earl Bradford, Aime LeVasseur, Margaret Martin, Lillian Mead, Mildred Merritt, Harold Weeds.

GRADE IV.

First Term—Jason Holman, Florence Poirier.

Second Term—Jason Holman, Per Latchis, Theodoro McDonald, Hattie Moon, Florence Poirier.

Third Term—Jason Holman, Mary Lynch, Hattie Moon.

GRADE III.

First Term—Eleanor Bailey, Gladys Cantlin, Albert Doucette, Marion Doucette, Edme LeVasseur, Harris Stewart, James White.

Second Term—Albert Doucette, Philip Knapp, Caleb Langille, Edme LeVasseur, James White.

Third Term—Eleanor Bailey, Caleb Langille, Edme LeVasseur, Kenneth Micott, Harris Stewart, James White.

LEBERT PRIMARY.

First Term—Diana Bergeron, Stephen Bouchie, Helen M. Kimball, Kenneth Perru, Delia Stewart, Ellen Watson, Harold White.

Second Term—Marion Dickerman, Lydia Poirier, Helena Splaine.

Third Term—Stephen Bouchie, Antionette LeVasseur, Kenneth Perry, Helena Splaine.

DEPOT STREET PRIMARY.

First Term—Gordon Cantlin, Paul Chamberlain, Helen Locke, Roy Merritt, Helena Owen, Gladys Sweet.

Third Term—Roy Merritt, Leon Veber.

MONUMENT SCHOOL.

First Term—Bertha Thomas, Ethel Thomas, Vashti Thomas.

Second Term—Ethel Thomas.

Third Term—Bertha Thomas, Ethel Thomas, Vashti Thomas.

PLAIN'S SCHOOL.

First Term—Lorena Browning, Ruth Browning, Ellen Smith.

Second Term—Ruth Browning.

Third Term—Ruth Browning.

CHESTNUT HILL SCHOOL.

First Term—Helen Blouin, Lena Coll, Margaret Coll, Thressa Coll, Marion Royce.

Second Term—Helen Blouin, Marshall Blouin, Thressa Coll.

Third Term—Helen Blouin, Marshall Blouin, Lena Coll, Margaret Coll, Thressa Coll, Marion Royce.

VITAL STATISTICS.

To the Selectmen:—In compliance with Public Statutes, Chap. 43, Sec. 4, requiring clerks of towns to furnish a transcript of the record of births, marriages and deaths for publication in the annual report, I hereby submit the following:—

MARRIAGES REGISTERED IN THE TOWN OF HINSDALE, N. H., FOR THE YEAR ENDING DECEMBER 31, 1910.

Date of Marriage.	Place of Marriage.	Name and Surname of Groom and Bride.	Residence at time of Marriage.	Age in yrs.	Color.	Occupation.	Birthplace.	Name of Parents.	Birthplace of Parents.	Condition	Name, residence and official station of person by whom married.

EDALBERT J. TEMPLE, Town Clerk.

STATE OF NEW HAMPSHIRE.

*To the Inhabitants of the Town of Hinsdale,
Qualified to Vote in Town Affairs.*

You are hereby notified to meet at the Town Hall on the second Tuesday of March next, at nine of the clock in the forenoon, to act on the following subjects:—

Article 1. To choose a Town Clerk for the ensuing year.

Article 2. To see if the town will vote to accept and adopt the report of the Selectmen, Auditors, and other town officers.

Article 3. To choose all other necessary town officers and agents for the ensuing year.

Article 4. To see how much money the town will vote to raise and appropriate for the payment of ordinary town charges, for the support of the poor, for the maintenance of the fire department, for lighting the streets, and for all other necessary expenses arising within the town.

Article 5. To see what action the town will take in regard to lighting the streets, or act in any manner thereon.

Article 6. To see if the town will vote to require the Boston and Maine Railroad to abolish the Doolittle crossing at grade, or any other grade crossing said railroad may construct, or act in any manner thereon.

Article 7. To see how much money the town will vote to raise and appropriate for the construction of the trunk line boulevard in town, or act in any manner thereon.

Article 8. To see how much money the town will vote to raise and appropriate for the purpose of taking care of the surface water from the highway in front of W. J. Estey's land, or act in any manner thereon.

Article 9. To see if the town will vote to place and maintain an electric light in the court on the east side of Todd's block, or act in any manner thereon.

Article 10. To see if the town will vote to place and maintain an electric light between the residences of W. W. King and F. H. Fuller, or act in any manner thereon.

Article 11. To see if the town will vote to raise and appropriate a sufficient sum of money to furnish one fire extinguisher for each occupied dwelling house outside the fire limits, to be plainly

marked "Town of Hinsdale," to remain the property of the town, and to be charged annually at the house-owner's expense. In case of accident or loss, the house-owner shall be liable to the town for the amount of damage; and, should a house become vacant, owner shall return that extinguisher to the town within ten days, unless the house is again occupied. The purchase, distribution, and supervision shall be left with the Selectmen, who shall keep records of same, make an annual inspection, and remove from any such dwelling-house any extinguisher not properly cared for. Or act in any manner thereon.

Article 12. To see how much money the town will vote to raise and appropriate for the care of the town cemeteries, or act in any manner thereon.

Article 13. To see if the town will vote to raise and appropriate the sum of fifty (\$50) dollars for sprinkling the streets near the Town Hall and School buildings in the village, or act in any manner thereon.

Article 14. To see if the town will vote to raise and appropriate the sum of four hundred (\$400) dollars for the purchase of 500 feet rubber lined hose, rubber coats and hats, and other supplies for use of Fire Department, or act in any manner thereon.

Article 15. To transact any other business that may properly come before said meeting.

Given under our hands and seals, in said Hinsdale, this twenty-seventh day of February, A. D. 1911.

FRANK A. DAVIS,	}	Selectmen of Hinsdale.
GEORGE A. ROBERTSON,

FRANK A. DAVIS,	}	Selectmen of Hinsdale.
GEORGE A. ROBERTSON,		
WALTER L. TODD,		

STATE OF NEW HAMPSHIRE.

To the Inhabitants of the School District of the Town of Hinsdale, qualified to vote in District affairs.

You are hereby notified to meet at the Town Hall in said District on Saturday, the eighteenth day of March, 1911, at three o'clock in the afternoon, to act on the following subjects:—

Article 1. To choose a moderator for the ensuing year.

Article 2. To choose a clerk for the ensuing year.

Article 3. To choose a treasurer for the ensuing year.

Article 4. To choose a member of the Board of Education for the ensuing three years.

Article 5. To hear the reports of agents, auditors, or officers heretofore chosen, and pass any vote in relation thereto.

Article 6. To see how much money the district will vote to raise and appropriate for the support of the schools for the ensuing year, in addition to the amount required by law.

Article 7. To see how much money the district will vote to raise and appropriate for the purchase

of text books and supplies for the ensuing year, or act in any manner thereon.

Article 8. To see how much money the district will vote to raise and appropriate for teaching music and drawing in our schools for the ensuing year, or act in any manner thereon.

Article 9. To see how much money the district will vote to raise and appropriate for the purpose of paying the salaries of the members of the Board of Education, Truant and other officers, as required by law.

Article 10. To see how much money the district will vote to raise and appropriate for a laboratory for the High School or, act in any manner thereon.

Article 11. To transact any other business that may properly come before said meeting.

Given under our hands and seal, in said Hinsdale, this the third day of March, A. D. 1911.
